

vlog User manual

vlog v 0.0.1.1 © 2013-24 unattended.ch

**Supported server formats :
Microsoft IIS, Nginx and Apache**

Download logfile, analyze it and upload .htaccess

The screenshot displays the vlog web application interface. On the left, a sidebar lists log files: mt220120.log (4 kB), un220119.log (55 kB), un220120.log (1 kB), vi220119.log (34 kB), and vi220120.log (1 kB). The main area shows a table of log records. The table has columns for id, date, time, ip, method, stem, query, bytes, agent, ref, stat, sub, country, and ipri. The records are filtered by 'All' and show 15 records. The status bar at the bottom indicates 'localhost weblogview connected'.
